Server	Friends class, repository and controller	Flo	Done
Client	Restful client and controller	Florentin	Done
GUI	Achievements / Gamification	Ollie	Done
Server	Achievements class, repository and controller	Sayf	Done

### Notes:

Overall this was a very productive week, we made good progress in developing our features made in the previous week further as well as in implementing some of the new required features. Something notable for improvement is usage of the issue board more efficiently, especially in collaboration between client side work and server side work towards the end of their independent tasks.
