

## Sprint Plan 1

Field	Task	Task Assigned To	Estimated effort	Task merge
Database	- Relational model EER Model (Database must be compatible to the Server/Client)	Jullian & Ollie	12 hours of work Medium level difficulty	Combine database with Server
Server	Ensure multiple clients can connect without dropping. Implement hashed password login a for a single admin client connection.	Florentine & Sayf	6 hours of work Difficult	Combine with database and Client
Client / GUI	Implement basic login GUI to client. Create wire-frames of the Home, Login and Register page.	Hashim, Tijs & Stelios	10 hours of work Medium level difficulty	Combine Client with Server

- The primary goal of this week is to split into teams focusing on three separate key parts to building our program. The client, server and database. By the end of week 3 we hope to have the tasks stated above complete and to merge each independent task completed with each other in the master branch.
